*This benefits the whole plant throughout its life, promoting stronger growth and more flowers.*

- It helps the roots of plants to extract water and nutrients from the soil.
- Works for roses and nearly all plants, except rhododendrons, azaleas and brassica.
- Particularly helpful in poorer soils and when transplanting.
- One resealable pouch will treat up to three bare root or containerized roses.

**Shrubs:** All roses listed here are ideal for a number of purposes in the garden, whether grown on their own, or in association with other flowers and shrubs. We have indicated varieties that also perform very well in large containers and those ideal for hedging.

**Sun/Partial Shade:** All are recommended for full sun or partial shade, provided there is not too much competition at the roots and the rose is not overhung by trees.
