

Organic Products Guide

2021

OUR PRODUCTS ARE
SUSTAINABLE
OUR COMMITMENT IS SOLID

Let's Grow Greener

We Help Grow Greener Gardens

At G&B Organics, we understand that gardeners are looking for products that are organic to get beautiful blooms and bountiful crops.

We also know that gardeners are looking for products that are kind to families, pets, and the environment.

We've dedicated ourselves to meeting the needs of gardeners by using the finest organic ingredients to make ours the label that gardeners trust.

Whether it's a backyard garden retreat or a patio garden in the middle of the city, our organic products help gardeners everywhere grow their gardens to their absolute best potential.

Let's Grow
GREENER

Our Products Are Sustainable

100% Organic

Anywhere you see a G&B Organics soil or blended fertilizer product, you can be sure you're looking at a product that is 100% organic. That means that every ingredient in those products—and every production process and facility—has been verified as compliant with USDA organic standards.

OMRI & OIM Listed

The Organic Materials Review Institute (OMRI) is the leading non-profit, internationally recognized material review organization accredited by the USDA Quality Assessment Division. OMRI verifies all ingredient and label claims validity, manufacturing process compliance, and public health & safety standards are compliant for organic use, all the way to the original source. Look for the OMRI logo on all our soils and blended fertilizers.

The Organic Input Material (OIM) listing is the California Department of Food and Agriculture's approval of meeting their stringent requirements for producing organic materials. Look for the OIM logo on all our soils and blended fertilizers.

Our Commitment Is Solid

Family Owned

G&B Organics has been family owned and operated for three generations, since 1925.

Locally Made

At G&B Organics, we're always looking for ways to source ingredients and produce our products as locally as possible to our customers. This reflects our commitment to sustainability, and to investing in local economies and businesses whenever possible.

People, Pet & Planet Safe

Although obviously not a food product, our products are safe for kids and pets to be in contact with immediately. And because they promote a healthy soil structure, they can reduce run-off and improve environmental health as well.

G&B ORGANICS® EDEN VALLEY BLEND Potting Soil

The perfect solution for indoor containers or outdoor potting, container planting, hanging baskets & raised beds

- Improves soil moisture retention*
