BILLING TERMS

ROTATIONAL BILLING PROCEDURE

1. All invoices are due net 30 to receive cash discount pricing.
2. All credit memos will be initiated by E.B.Stone & Son and should not be deducted by the dealer prior to posting of the credit. Credits will only be issued for defective manufactured goods (made by us) where E.B Stone & Son has been notified at time of delivery or within 24 hours of delivery.

TERMS OF SALE

1. Past due accounts are subject to a service charge of 1.5% per month (18% per year) on all past due portions of the accounts.
2. Accounts 31 days past due will become prepayment accounts. This will require payment in the amount of the order to be made to the Territory Manager at the time of placing the order, plus a minimum of 20% of the outstanding balance. This prepayment status will continue until the account is current. All prepayment monies will be applied to the oldest portion of the account. The company reserves the right at it's sole discretion to modify credit terms. Accounts deemed to present elevated credit risk may be permanently subject to C.O.D terms.
3. Checks returned due to insufficient funds will incur a \$30 service fee.
4. All orders are entered and approved at Suisun, California.
5. If suit is filed or an account is assigned for collection by any agency, buyer agrees to pay all court costs, collection costs and reasonable attorney's fees. All suits shall be in the court jurisdiction of Solano County CA

PRICE CHANGES

1. Prices are subject to change without notice, although every effort will be made to keep you informed of price changes through our Territory Manager

DELIVERY POLICIES

1. Minimum order for delivery is \$1,200.00 of Branded E.B Stone or GreenAll soils or fertilizers.
2. Merchandise which has been shipped as ordered and received in good condition will be subject to a 20% special handling charge if it is returned for credit.

Agricultural Lime (Dolomite Lime)

E.B Stone Organics Agricultural Lime is derived from naturally occurring lime stone and supplies calcium and magnesium to the soil. It is useful for increasing the pH of the soil. For lawns and gardens as well as supplementing plant nutrition and soil nutrients. The pH of the soil is the measurement of how acid or alkaline it is. Adding Agricultural Lime to acid soils aids in creating a more neutral pH (pH 7.0). To ensure productive garden soil, it is best to maintain a pH of 5.5 to 7.0. Most plants thrive when at a pH range of 6.0 to 7.0 where most nutrients necessary for plant growth are the most available. This product is 100% natural and organic. Contains calcium, magnesium, calcium carbonate, magnesium carbonate and calcium carbonate equivalent. Derived from Dolomitic Limestone. Also contains non-plant food ingredient : Lignosulfate (Binder).

1.5 lb.	12	349-04	607263-02349-6

Blood Meal 13-0-0

E.B Stone Organics Blood Meal is a long lasting source of natural organic nitrogen which is readily available to plants. It is ideal for use on most garden plants to encourage growth and improve leaf color. It is suitable for use on fast growing plants throughout the garden including vegetables, perennials, annuals, roses, shrubs and trees. Our product may be used as a nitrogen source in compost piles. This product is 100% natural and organic. Derived from blood meal. Contains: Nitrogen.

30 lb.	1	357-04	607263-00357-3

Soil Sulfur

E.B Stone Naturals Soil Sulfur is designed to adjust the pH level of soil. Soil Sulfur helps lower the pH in alkaline soils. It also helps to maintain green color leaves and aids in the use of nitrogen fertilizer by the plant. Special Note: The amount of Soil Sulfur required to change the soil pH may vary considerably depending on the soil type, the climatic conditions and the general composition of the soil. These conditions may require adjustments to the application rates recommended on the actual label. Derived from Elemental Sulfur. Contains Sulfur. Also available in 20lb. bag on page 28 labeled as pH Adjuster Plus.

Size	Pack	Item #	UPC
5 lb.	12	348-04	607263-02348-9

Sul-Po-Mag 0-0-20

E. B. Stone Naturals Sul-Po-Mag is a naturally occurring crystalline material, known as langbeinite. It is an excellent source of readily available sulfur, potassium and magnesium. Contains Sulfate of Potash Magnesia. Potassium encourages root growth and increases plant resistance to disease. It can also aid in increasing winter hardiness and increasing the size and quality of fruit. Magnesium is a key component of the chlorophyll molecule, which is responsible for the green coloring in plants. Sulfur, an essential protein ingredient, helps maintain the green color in leaves and aids in the use of nitrogen fertilizer by the plant. Sulfur also helps lower a soil's pH. Derived from Sulfate of Potash Magnesia. Contains soluble potash, magnesium, sulfur.

Tomato & Vegetable Food 4-5-3

E.B Stone Organics Tomato & Vegetable Food is formulated from quality natural organic ingredients for use throughout the vegetable garden as well as with soft fruits like strawberries. It will contribute to even plant growth without producing excessive foliage at the expense of fruit. The additional phosphorous helps to ensure the production of high quality fruits and vegetables. The calcium in our Tomato & Vegetable fertilizer aids in preventing disorders like blossom end rot and helps to correct acidic soil conditions. Contains Blood Meal, Feather Meal, Bone Meal, Dried Chicken Manure, Bat Guano, Alfalfa Meal, Kelp Meal, Potassium Sulfate, Humic Acids and soil microbes including mycorrhizal fungi.

Edna's Best Potting Soil

E.B. Stone Organics Edna's Best Potting Soil is a special blend of the finest 100% natural and organic ingredients formulated to make a superior mix for container gardens. It is ready to use right out of the bag in any size pot from starter pots to larger containers. We've created a potting soil with excellent moisture retention and air-filled pore space encouraging root growth. It is a fir-based mix which lasts much longer than peat moss based potting soils. We also use pumice for drainage which stays down in the soil and will not float on the surface like perlite. Contains aged fir bark, aged redwood, sphagnum peat moss, pumice, earthworm castings, sand, feather meal, bat guano, alfalfa meal, kelp meal, and mycorrhizae. Oyster shell lime and dolomite lime as pH adjusters. A natural wetting agent has been added to help re-moisten the product. Available in larger size see page 18

Soil Booster

E.B. Stone Organics Soil Booster is a unique blend of 100% natural and organic ingredients designed to meet the growing needs of vegetables, herbs, and flowers. Plants require ideal soil conditions to reach their full potential and we developed our product with that in mind. The product adds organic matter to the soil which helps increase microbial activity, loosen compacted soils, conserve moisture, and improve soil aeration. When mixed with native soil, the product will help to produce bountiful crops and beautiful blooms. It's a great soil conditioner as well. It breaks up hard clay soil and adds organic material to help sandy soils hold onto nutrients. **Contains** aged forest products, aged fir bark, chicken manure, earthworm castings, pumice, feather meal, bat guano, alfalfa meal and kelp meal.

Recipe 420 Hy-Por Potting Soil

Let's get growing inside.

You're growing indoors in containers. This is where really great drainage - in a high porosity soil makes all the difference. Recipe 420 Hy-Por Potting Soil lets plant roots breathe, while holding onto the moisture they need. This critical air / moisture combination also provides a robust environment for soil microbes. Recipe 420 Hy-Por Potting Soil is a 100 % natural and organic blend of high performance ingredients, rich organics, and hard working microbes. Hand selected ingredients for the specific needs of professional growers: Fir bark, perlite, coir, peat moss, earthworm castings, azomite, seabird guano, feather meal, bat guano, kelp meal, and wetting agent (yucca schidigera saponin). It also contains other non-plant food ingredients such as beneficial bacteria and endo mycorrhizae.
